CASE IH QUADTRAC[®] SELECTOR GUIDE

camoplast

CAMOPLAST® **DURABUILT™**

FOR CASE IH QUADTRAC STX AND 9300 SERIES

DuraBuilt track technology from Camoplast is the ideal track solution for Case IH Quadtrac series tractors. Choose DuraBuilt tracks to meet all of your requirements in agricultural and construction environments. You can count on DuraBuilt tracks from Camoplast.

CAMOPLAST DURABUILT 3500 **HIGH DURABILITY AGRICULTURAL SERVICE TRACK**

The DuraBuilt 3500 series meets or exceeds original OEM track specifications. This track is appropriate for use in all primary and secondary tillage operations. The treadbars are specifically designed to provide good soil penetration, traction and cleanout in agriculture applications.

Note: DuraBuilt 3500 series tracks are not recommended for construction usage. If machine is used in construction, is involved in frequent roading operations or high pull on hard ground, use the DuraBuilt 5500 series.

CAMOPLAST DURABUILT 5500 **PREMIUM FEATURE HEAVY DUTY TRACK**

The DuraBuilt 5500 series for Case IH Quadtrac tractors is specifically designed to meet the requirements of the most demanding applications. The 5500 scraper track includes all of the best features of the DuraBuilt 3500 and also uses a specialized tread configuration optimized for operation on hard surfaces. Shorter, wider footprint treadbars provide a smoother ride on the haul and limit the high load/high powertrain torques while loading.

TRACK SELECTOR GUIDE - Available widths

Case IH Quadtrac STX Series (252" Circumference)

30" The 30" width is the preferred choice on the Quadtrac STX series. It offers a good balance of floatation, traction, and durability in a variety of applications. The track is well supported by the wheels across its entire width, and as a result delivers even tread wear and less vibration.

| Series | Type | Camoplast Part # | OEM Part # | Treadbars | | | | Drive Lugs | | Carcass | |
|--------|---------|------------------|------------|-----------|--------|-----------|-------|------------|-------|--------------|------------|
| | | | | # Treads | Height | Tip Width | Pitch | # Lugs | Pitch | Thickness | Ply Layers |
| 3500 | Ag | 634-3023 | N/A | 84 | 2.0 | 1.7 | 6.0 | 42 | 6.0 | 1.25 (32 mm) | 3 |
| 5500 | Scraper | 654-3011 | N/A | 84 | 1.6 | 2.2 | 6.0 | 42 | 6.0 | 1.25 (32 mm) | 3 |

36" The 36" width is used in some specialized ag applications. It offers additional floatation and can help keep material out of the undercarriage.

| | | | | | | | | | | | |
|------|----|----------|-----|----|-----|-----|-----|----|-----|--------------|---|
| 3500 | Ag | 634-3616 | N/A | 84 | 2.0 | 1.7 | 6.0 | 42 | 6.0 | 1.25 (32 mm) | 3 |
|------|----|----------|-----|----|-----|-----|-----|----|-----|--------------|---|

Case IH Quadtrac 9300 Series (234" Circumference)

30" The 30" width is the preferred choice on the Quadtrac 9300 series. It offers a good balance of floatation, traction, and durability in a variety of applications. The track is well supported by the wheels across its entire width, and as a result, delivers even tread wear and less vibration.

| Series | Type | Camoplast Part # | OEM Part # | Treadbars | | | | Drive Lugs | | Carcass | |
|--------|---------|------------------|------------|-----------|--------|-----------|-------|------------|-------|--------------|------------|
| | | | | # Treads | Height | Tip Width | Pitch | # Lugs | Pitch | Thickness | Ply Layers |
| 3500 | Ag | 634-3026 | N/A | 78 | 2.0 | 1.7 | 6.0 | 39 | 6.0 | 1.25 (32 mm) | 3 |
| 5500 | Scraper | 654-3025 | N/A | 78 | 1.6 | 2.2 | 6.0 | 39 | 6.0 | 1.25 (32 mm) | 3 |

THE INDUSTRY STANDARD

The Camoplast Tracks & Systems Group designs, engineers, and manufactures rubber tracks, undercarriage components and systems for the agricultural sector around the globe. DuraBuilt tracks from Camoplast have earned a position as the industry standard for the most demanding applications and environments. These tracks are the culmination of nearly 50 years of research and development by the world's leading rubber track experts. Every day, our track designs demonstrate proven reliability for the most prominent OEM names in the agricultural industry.
